TRUCK SPRAYBOOTH

Downdraft Side-Exhaust
1000T

American Made!

This booth is pre-fabricated, pre-fitted and holes are pre-punched from 18 gauge galvanized steel. The air is double filtered for the cleanest air possible. The intake air is pulled through the side filters then through the ceiling filters. The exhaust air is pulled out either side of the booth or through a floor pit. Efficient operation, clean air and a clean environment is what you get with this UniCure Truck Spraybooth.

UniCure Truck Spraybooths are a step ahead.

All Spraybooths are available with Infrared Heat or Heated Air Make-up with paint cycles or paint and cure cycles.

Manufactured to your needs – longer, shorter, wider or narrower.

Spray Cycle - 100% Fresh Air

UniCure 1000's spray cycle provides you with the control necessary for quality finishes using today's clear coat systems.

Drying Cycle - 100% Fresh Air

To conserve energy, the UniCure System's air flow is reduced by 50% using 100% fresh air during the curing cycle.

The energy efficient curing cycle means more jobs can be painted correctly per day.

Dimensions

Length 35' and Up

Width 16', 18' or 20'

Height 16', 18' or 20'

Custom Sizes and Designs Available

Options

- Powder Coated White (Inside & Out)
- Downdraft Side Exhaust
- Downdraft 4 Tunnel Pit
- Drive-Through doors with or without windows

Note

- 1) Heated Air Make-up can be mounted on either side, rear, above booth or ceiling.
- 2) This booth is constructed of 18 gauge electro-galvanized sheet steel. Precision punched and bolted on six inch centers for maximum rigidity. Panels have exterior flanges to provide a smooth interior surface.
- 3) Exhaust units and motors supplied are based on the booth installed with a maximum of 25' straight exhaust ducting. When additional ducting or elbows are used, a higher output fan and larger motor might be required. If so, consult your factory representative.
- 4) Modifications to fit your requirements.
