- The spraybooth construction and exhaust air flow velocities are designed to meet or exceed OSHA standards.
- This booth is constructed of 18 gauge galvanized sheet steel with interlocking flange edges that are fastened together with self tapping speed screws. Panels have exterior flanges to provide a smooth interior surface.
- The doors are built with two inch by two inch square tube frames for heavy duty service, and have a lip air seal. One 36" X 84" personnel access door is standard. The door can be located on either side to meet user requirements.
- Booths require electrical connections to the fan and light fixtures, mechanical duct system connections for air discharge to the outside, and hardware for anchoring the booth to the floor.
- Caulking, rubber seals for doors, fasteners, and all necessary hardware for complete mechanical installation are furnished with all units.
- Specifications subject to change without notice.
