

The UniCure Split Duct System

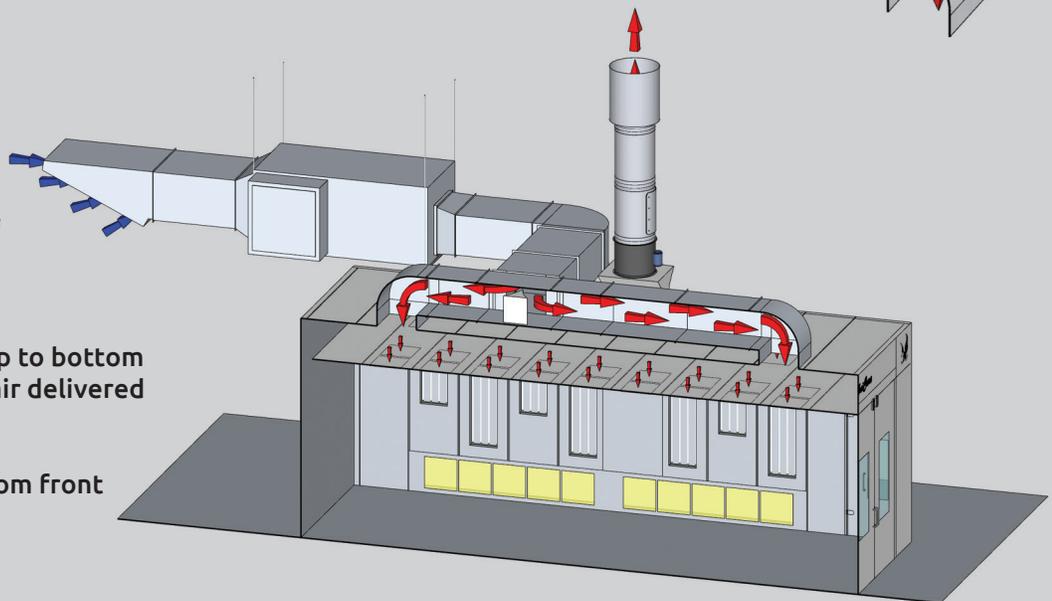

Heated downdraft airflow the right way!

UniCure Split Duct System

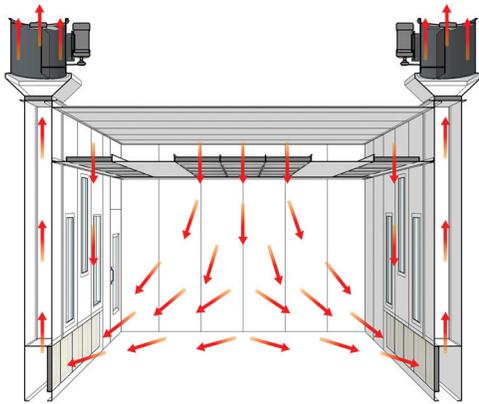

- Heated air delivered to front & back of the upper plenum
 - Not to only one location
- Heated air delivered to the top of the upper plenum
 - Not to the side of the plenum
- Even airflow in the booth from top to bottom
 - No dead spots in front due to air delivered in rear
- Even temperature in the booth from front to back & left to right

Certain site conditions must be available.
